STORM DRAINAGE AND SUMP PUMP INSPECTION APPLICATION

Applicant's Name: _____

Property Address: _____

Telephone: _____

Please check one: Buyer Seller

Is there a basement in the house? _____

Is there a sump pump in house? _____

Do you have a bubbler system? _____

Q: Why do I need an inspection?

A: The Village of Sloan is under an Order on Consent from the New York State DEC. The Order mandates the Village to reduce Sanitary Sewer Overflows that occur during heavy rains and snowmelt. One method is for the Village to verify that all storm water is draining appropriately into the storm system and that all sanitary drains into the sanitary system.

Q: What does the inspection involve?

A: The Code Official will verify that your sump pump and gutters/downspouts drain directly onto your lawn or into a verifiable bubbler system. All downspouts should be directed away from your foundation but NOT onto a neighboring property. All storm water discharge should be onto a permeable area and not a driveway/walkway/sidewalk, which may freeze in the winter resulting in a safety hazard.
